

Chris Baker

Head of Enel X Way in North America

As the Head of Enel X Way in North America, Chris Baker leads the company's smart charging infrastructure business and brings over two decades of general management, sales, and consulting experience. As a senior energy executive, he previously served in sales leadership at Stem Inc. and Bloom Energy and is focused on commercializing new energy technologies. He is passionate about the viable implementation of e-mobility (EV) and distributed energy (DER) solutions including EV infrastructure, energy storage, and hydrogen technologies. He previously held roles in energy trading, consulting, and the U.S. federal government.

Married with a son and daughter, Mr. Baker holds degrees in Economics and Biology from the University of California at San Diego and was awarded the Heffernan Service Award while earning his MBA at Columbia Business School.

“I’m excited to continue supporting a company with such leadership in the sustainability space. The future of transportation is electric and Enel X Way offers a leading platform to enable rapid change. This means not just selling charging stations but providing the full range of services that utilities, drivers, automakers and corporate fleets will need to be successful.”

- Chris Baker, Head of Enel X Way North America
